SECRET/SECURITY INFORMATION 25X1 (d) LORENZ-100. This was a telegraphic transmitter which was used in conjunction with the EP-2A goniometer receiver in the mobile van goniometer set. At military airfields, this unit transmitted on 425 kes and had a power output of 100 watts. This equipment was also German-made. (e) JALTA. This was a radio transmitter-receiver 25X1 equipment which was used for landing This was (f) aircraft. 25X1 The Czechs had the SCS-51, Halicraft, Hammerlung, Liaison and VHF Command radio equipment, electronic equipment in use in the CSR was of 25X1 origin that was in stock from World War II. The majority of the equipment used in CSR military aircraft was of origin. 25X1 equipment used in CSR military aircraft was the 25X1_: type aircraft. set which was used in The 25X1 was a transmitteronly Soviet electronic equipment receiver set 25X1 All the electronic equipment was old. The tubes were very old and had been used prior to being used at the school. There was a critical shortage of tubes within the CSR. The majority of the tubes manufactured by Tesla in Czechoslovakia were exported to the tubes were still being used from an old tubes for stockpile on hand and 25X1 came from a stockpile on hand from World War II. 25X1 a nameplate made of either aluminum 25X1 or brass, and a tube.
